Project Cargo - is always a difficult task. A lot of knowledge and experience is required for its implementation. MTR has experience in project cargo since 2005 - is the partner that you need to implement your projects.

MTR - your transport operator to organize the full range of services for the delivery of your project cargo on the most optimal conditions and a reasonable balance between the cost of transportation and transit time.

Based on years of experience of MTR in multimodal transport project and oversized cargo for companies operating in industries such as: metallurgy, petrochemical industry, energy, agriculture and construction, the company offers you a range of services, providing guaranteed delivery of your cargo:

- **Develop a feasibility study on the project of transportation:**
- choice of route of transportation;
- selection of the necessary means of transport;
- economic calculations for the proposed project.

- **Design of placement and mounting of non-standard and oversize cargo:**
- obtain the necessary certificates, permits, classification decisions in FCS;
- development and coordination of drawings of loading and fastening cargo;
- development of special devices;
- technological support.

- **Transportation of goods by all modes of transport:**
- mobilization of vehicles;
- delivery of goods to your desired location;
- organization of unloading cargo from the vessels and deliver to the place of destination;
- convoy during transportation.
