Weight category of wagon dispatch is defined by calculated dispatch mass in accordance with the following table.

Calculated shipment weight	Weight category
12t and less	
10t	
From 13 to 16t	
15t	
From 17 to 23t	
20t	

From 24 to 26t

25t

From 27 to 31t

30t

From 32 to 36t

35t

From 37 to 40t

40t

From 41 to 46t

45t

From 47 to 51t

50t

From 52 to 55t

55t

56t and more

60t

Loading the wagon below the minimal weight norm, calculated dispatch mass is minimal weight norm of wagon loading.

Loading the wagon above minimal weight norm of wagon loading, calculated dispatch mass is actual dispatch mass, rounded to full tons, but not less than mass of weight category, which this dispatch is in.

Calculated dispatch mass is actual dispatch mass, rounded to full tons, and 500 kg and more are rounded to full ton, and less than 500 kg are not considered.

In small dispatches, calculated dispatch mass is actual dispatch mass, rounded to full 100 kg, if dispatch mass is up to 3,300 kg inclusive. If dispatch mass is over 3,300 kg, calculated dispatch mass is actual dispatch mass, rounded to full 100 kg, but for at least 5 tons.
